SUMMARY

Seeking a internship or entry-level position where I can apply my computer science knowledge and technical skills, learn modern tool and practices, grow professionally, and contribute to the organization through strong analytical abilities, problem-solving and adaptability.

SKILLS

- Version Control: Git, GitHub
- Databases: PostgreSQL, phpMyAdmin
- Web Technologies: HTML, CSS, JavaScript, PHP, Python
- Development: Front-end & Back-end Web Development
- Tools: Visual Studio Code

EDUCATION

TAGUIG CITY UNIVERSITY

Bachelor of Science in Computer Science

2022 - Expected July 2026

PROJECTS

AI SCHOLARSHIP EVALUATION SYSTEM (TCU-CEAA)

Python, Django, React, PostgreSQL

- Built an AI-driven scholarship and grant evaluation system for TCU-CEAA, automating applicant screening with OCR, computer vision, NLP, and document-verification models.
- Implemented a secure backend evaluation pipeline and user-facing submission workflow, enabling fast, consistent, and transparent scholarship scoring.
- Deployed the platform on a scalable cloud-ready architecture, significantly reducing manual review time and improving evaluation accuracy.

GRADUATE SURVEY RESPONSES

HTML, CSS, JAVASCRIPT, PHP, SQL

- Developed GraduateSurveyResponses, an interactive dashboard that visualizes alumni tracer data using Chart.js, searchable records, and client-side analytics.
- Built a CSV-driven data workflow with optional PHP/MySQL integration for researchers, enabling editable records and flexible data management.
- Implemented a modular, responsive UI with filtering, metrics, and error-handled data loading for reliable use in academic program evaluation.
